

Enabling the Expansion of England's Largest Breast Screening Service

Royal Free London NHS Foundation Trust x DEOS Consulting Ltd

DEOS is proud to partner with the Royal Free London NHS Foundation Trust (RFL) to expand breast screening services to 750,000 eligible women—310,000 additional patients—through the deployment of six mobile screening units and two fixed sites.

48 hours

Network deployed
in just two days

**750,000
women**

Eligible women served

310,000

additional patients

**6 mobile units
+ 2 fixed sites**

New screening infrastructure

The Challenge

To support the Trust's growing preventive care infrastructure—which now includes six mobile screening units and two fixed sites—a rapid, secure, and reliable IT solution was needed to ensure seamless data flow and compliance across all locations.

The Solution

DEOS deployed a complete IT infrastructure across all new sites, including the implementation of **DEOS Optima** and **DEOS Circle Plus**. The network was installed and fully operational in just two days, delivering secure connectivity and optimised workflows from day one.

Results & Impact

Thanks to the hard work of our deployment team and the power of our technology, the Royal Free London has officially become the largest provider of breast screening in England. The Trust can now deliver high-quality screening services to 750,000 women—310,000 more than before—supported by a resilient, scalable, and future-ready IT platform.

“

Thanks to the hard work of the DEOS team and the power of our technology, the Royal Free London has officially become the largest provider of breast screening in England.
